Leakage due to rains**

WOODEN COTTAGES

WHY USE WOOD/BAMBOO?

Wood/Bamboo is a natural insulator and is very effective in isolating cold and heat. This means a saving a significant amount of energy when compared to stone, concrete and brick houses.

It's environmentally friendly

It's strong

It's earthquake and hurricane resistant

It's Looks beautiful

It's water proof

Wooden construction are quick to build when compared to buildings made from materials such as stone or concrete. This fast build represents a significant monetary saving.

The wooden houses can be re-modelled and relocated and redone with ease and minimal wastage.

wooden structures actively help the environment by absorbing and storing atmospheric Co₂.

The warm and natural attributes of wood design generate positive feeling and can contribute immensely to an individual's overall sense of well being
