

The image shows three rolls of a light-colored, woven cane mesh material. The rolls are stacked horizontally, with the top roll slightly offset to the right. The mesh has a consistent diamond-shaped pattern. The background is a close-up of the same material, showing the texture and weave.

KENWOOD
FURNITURE

Rattan is a natural, vine-like palm that grows in the tropical regions of South East Asia and Africa. Rattan has quickly found itself to be one of the most popular materials for indoor and outdoor furniture. Rattan is lightweight and its natural color brightens up the environment to bring in a relaxed vibe.
